Tableau Dashboard Review - Agent Review

Workbook: **ModelPerformanceDashboard_17623946258000** | Generated: 2026-11-09 | Passed: **8 of 19**

Item	Question	Pass (Y/N)	Recommended Changes
AR-05	Official logo is in the upper left corner and is visible against background color	N	Place the approved logo (amp'd logo for amp'd dashboards, Cotality logomark otherwise) in the upper-left corner of every dashboard and replace any placeholder image with the final branded asset. (target: ModelPerformanceDashboard_17623946258000)
AR-06	Metadata complete (data update date, dashboard contact, data owner)	Y	
AR-07	Arial font used throughout the dashboard. Worksheet titles are Arial Black	Y	
AR-08	Current Cotality branding colors used	N	Remove Tableau 10 / Tableau 20 palette assignments and re-encode marks using the Cotality-Extended or CotalitySecondary custom palettes. (target: ModelPerformanceDashboard_17623946258000)
AR-10	No more than 6 views in the dashboard	N	Reduce the dashboard to at most 6 views. Consolidate related KPI worksheets into combined cards, or move secondary analysis to another dashboard. (target: Model Surveillance Executive Summary) Reduce the dashboard to at most 6 views. Consolidate related KPI worksheets into combined cards, or move secondary analysis to another dashboard. (target: Underperforming Models)
AR-11	Effective color usage with 1-2 dominant colors from Cotality primary palette. Can be supplemented by Cotality secondary palette and neutrals. User accessibility considered	N	Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and replace any red/green pairing with a brand-compliant diverging palette such as Teal / Grey / Coral. (target: [none:Calculation_1121267945734144:nk]) Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and replace any red/green pairing with a brand-compliant diverging palette such as Teal / Grey / Coral. (target: [none:Calculation_910571561830731782:nk]) Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and replace any red/green pairing with a brand-compliant diverging palette such as Teal / Grey / Coral. (target: [none:Overall_Model_Performance (copy)_2415417935630338:nk]) Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and replace any red/green pairing with a brand-compliant diverging palette such as Teal / Grey / Coral. (target: [none:Overall_Model_Performance:nk]) Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and replace any red/green pairing with a brand-compliant diverging palette such as Teal / Grey / Coral. (target: [:Measure Names]) Restrict each view to 1-2 dominant primary-palette accents (Sunray, Coral or Violet) with neutral greys for other marks, and repl...
AR-12	Views are organized by importance (top to bottom, left to right)	Y	
AR-13	Minimum of 10px for outer and inner padding between views	N	Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Data Last Updated:) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Performance Details) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Total Models by Business Unit) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Total Models by Surveilance Type) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Total Models by Analytics Department) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Total Models by Performance) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Active US Models) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Donut chart-implemnt Deail in one) Select each view in the dashboard Layout pane and set outer padding to 20px (minimum 10px) and inner padding to 10-15px. (target: Surveillance Implementation Detail) Select each view in the dashboard Layout pane and set outer paddi...
AR-14	Text size primarily follows style guide	N	Set dashboard titles to 24-28pt, chart titles to 15-16pt Arial Black, chart headers to 11-12pt and labels/other text to 10-11pt. (target: ModelPerformanceDashboard_17623946258000)

Item	Question	Pass (Y/N)	Recommended Changes
AR-15	Consistent font sizes for each text category (dashboard title, chart headings, labels, tooltips)	N	Standardise the font size, weight and colour used within each text category so all chart headers, labels and tooltips match. (target: ModelPerformanceDashboard_17623946258000)
AR-16	Charts and tables have unnecessary gridlines and bandings reduced/removed	N	In Format > Lines switch off gridlines, zero lines and drop lines, and set row/column banding size to 0 where it adds no meaning. (target: ModelPerformanceDashboard_17623946258000)
AR-17	Charts have concise, horizontal axis labels for the x-axis	Y	
AR-18	Tiled containers primarily used over floating containers	N	Dock floating parameter controls and text objects into the tiled layout container so they render predictably when published. (target: Model Surveillance Executive Summary) Dock floating parameter controls and text objects into the tiled layout container so they render predictably when published. (target: Model Surveillance Expansion) Dock floating parameter controls and text objects into the tiled layout container so they render predictably when published. (target: Underperforming Models)
AR-19	Does the dashboard have directions on interactivity (not including dropdown filters)?	Y	
AR-20	Do charts, tables, tooltips and other metrics have business friendly names and are spelled correctly?	N	Correct the spelling in the affected titles, tooltips and field names; rename generated calculations to business terms; and remove '(copy)' suffixes and trailing spaces. (target: ModelPerformanceDashboard_17623946258000)
AR-22	Limit custom SQL in live connections. Use Tableau relationships where possible	Y	
AR-23	Use "Show Apply Button" for multi-select filters	N	Select the filter control, open Customize and enable Show Apply Button. (target: Performance Details) Select the filter control, open Customize and enable Show Apply Button. (target: Surveillance Implementation Detail)
AR-24	Avoid filter lists with many unique values	Y	
AR-25	Close unneeded sheets and hide sheets that are in use	Y
